

Virginia Governor McAuliffe signs 11 Bills Promoting Solar and Renewable

By: Robert F. Riley

05.23.2017

On Monday May 8, Virginia Governor Terry McAuliffe signed 11 bipartisan bills (passed by the Virginia General Assembly earlier this year) which promote the use of solar and other renewable energy options and endeavor to reduce energy consumption across Virginia. Governor McAuliffe signed the legislation into law at a ceremonial bill signing at the Virginia Executive Mansion and was joined at the signing by Katie Payne (Williams Mullen Government Group and Solar Team member) and by clean energy industry stakeholders and several bill patrons.

The following link provides the Governor's press release.
